FOR IMMEDIATE RELEASE

# SixApart confirms, Bloggers Are Dying

*rkz - Gnaa, Nigeria*

SixApart announced today that their popular googlehacking software, MovableType has been relicenced as cripleware. With the release of MovableType 3 many bloggers will have to shell out a \$69.99 licence fee.

## **GNAA (The Gay Nigger Association of America) strikes a blow against bloggers.**

Many users speculate that the GNAA's comment spamming technology has been responsible for this price change, to combat FloodMT; Six-Apart were forced to have a central database of registered posters. This costs money.

The GNAA president timecop said in a statment today, "This is a great victory victory for Gay Niggers everywhere, the bloggers have been conspiring against us for some time, trying to oppress our gay niggerdlyness now we are one step closer to taking over the world".
